# CACI SYNERGY

The new **CACI Synergy system** combines the functionality of our two best-selling systems, the **CACI Ultra** and the **CACI Ultimate** and introduces pioneering **S.P.E.D™** microcurrent LED technology, a breakthrough new advancement in microcurrent therapy.

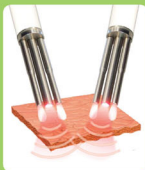

For the first time on the market, skincare specialists will be able to harness the power of LED light therapy at the same time as using microcurrent. The dual action of simultaneous LED and microcurrent energy stimulates tissue regeneration and helps in the production of collagen. The synergy of these two technologies provides more visible and longer lasting results.

The CACI Synergy offers: new S.P.E.D™ microcurrent LED technology, orbital dermabrasion, ultrasonic peeling and CACI's unique Wrinkle Comb (a non-invasive alternative to dermal fillers).

With so many treatment options available, salons can now offer a complete range of anti-ageing and skin rejuvenation solutions using just one advanced treatment system.

## S.P.E.D™ (SIMULTANEOUS PHOTO ELECTRICAL DELIVERY)

- High brilliance red and blue LED's with pulsed and continuous wave lengths
- Pulsed LED drives the light deeper into the tissue for tissue healing and stimulating collagen production
- Continuous wave LED works on the superficial skin tissue
- Red light stimulates collagen, cell renewal, blood circulation and wound healing
- Blue light soothes and calms, kills bacteria and is antiseptic and anti-irritant
- Used in conjunction with CACI microcurrent it enhances treatment results with its dual technology

## S.P.E.D™ (Simultaneous Photo Electrical Delivery) Microcurrent LED Technology

Dual action technology using high brilliance LED light therapy with simultaneous CACI microcurrent for enhanced skin treatment results.

WITHOUT SURGERY,  
ANAESTHETIC OR  
DOWNTIME**

### MICROCURRENT WITH S.P.E.D™ TECHNOLOGY

Originally developed for treating facial palsy, microcurrent therapy is now widely used as an aesthetic anti-ageing treatment. True microcurrent uses a current with an intensity of less than one millionth of an amp (<1mA). A higher intensity current will cause contractions of the facial muscles, which can worsen lines and wrinkles, whereas microcurrent stimulation does not contract muscles, but instead works by a process called muscle re-education to achieve results.

### ORBITAL MICRODERMABRASION

CACI's exfoliation technology uses a hand piece with an abrasive tip that rotates at different speeds on an elliptical axis. A selection of single use, disposable abrasive treatment tips coated with a layer of silicon carbide are used to either superficially or deeply exfoliate the epidermis. This unique crystal free and vacuum free method overcomes the blockage, maintenance and downtime issues commonly associated with traditional microdermabrasion systems.

### ULTRASONIC

Ultrasonic peeling uses a hand piece containing ceramic/quartz transducers that when excited by an electrical current emit piezoelectric vibrations. These rapid vibrations (27,000 per second) propel impurities to the skin surface and cause dead skin cells to become dislodged. The vibrating hand piece is then used to deeply cleanse and gently exfoliate the epidermis. Ultrasonic skin peeling provides a gentler and less aggressive method of skin exfoliation than traditional crystal microdermabrasion.

### ELECTRO CELLULITE MASSAGER (ECM)\*

The ECM combines the therapeutic benefits of massage with the effectiveness of microcurrent therapy. Rollers are electrically charged with microcurrent to knead tired shoulders, soothe aching limbs and firm sagging muscles. The stimulatory action of the ECM tones muscles and reduces inches by improving lymph drainage and breaking down fatty deposits.

#### ▶ TREATMENTS

- Facial Toning ✓
- Lines / Wrinkles ✓
- Eye Bags ✓
- Skin Hydration ✓
- Skin Peeling ✓
- Acne / Blemishes ✓
- Neck Treatments ✓
- Cellulite (with ECM)\* ✓
- Stretch Marks ✓
- Hand Treatments ✓
- Jowl Lifting\* ✓

\* Optional Attachment

### WRINKLE COMB (LED LIGHT THERAPY)

The Wrinkle Comb combines LED light therapy with high frequency microcurrent. The synergy of these two technologies plumps out and softens lines, wrinkles and stretch marks, thereby providing a non invasive, needle free alternative to collagen injections and other dermal fillers. The system has the option to select Red or Blue LED light therapy or an alternating pulsed LED mode that is particularly effective at treating acne and skin blemishes.

### HYDRATONE WITH S.P.E.D.™ TECHNOLOGY

Hydratone combines active microcurrent rollers and LED light therapy with Hydro Mask, a unique, electrically conductive silicon gel mask infused with powerful hydrating properties. The rollers gently massage the face causing the mask to become electrically charged so that the whole face is bathed with rejuvenating energy. The Hydratone procedure takes just 10 minutes to perform yet provides immediate and intensive skin hydration and face firming.

### JOWL LIFT WITH S.P.E.D.™ TECHNOLOGY\*

The CACI Jowl Lift facial uses Quad Probe applicators with LED light therapy designed to double the lifting action on the jawline, thereby enhancing results and reducing treatment time. This facial treatment helps to improve the appearance of sagging jowls by emitting tiny electrical impulses to lift, firm and redefine facial contours.

\*Optional attachment

### EYE REVIVE\*

The CACI Eye Revive treatment uses serum filled CACI microcurrent rollers together with a deeply nourishing Hydro Eye Mask to lift hooded eye lids, reduce puffiness and dark circles and soften the appearance of fine lines and wrinkles around the eyes.

\*Optional attachment

### ELECTRO BUDS

CACI systems utilise specially developed serum filled cotton buds to enhance treatment results. The serum contains Hexapeptides and powerful anti-ageing ingredients to provide an instant face firming effect. Electro buds are also perfect for retail.

## **SYNERGY** [sin-er-jee] *noun*

*"The interaction or cooperation of two or more forces to produce a combined effect greater than the sum of their separate effects"*

*Oxford English Dictionary*

### **THE CACI DIFFERENCE**

All CACI systems deliver microcurrent energy using ultra low frequencies and the power of a unique digitally simulated tidal wave.

This special digital waveform optimises results and comfort by gradually increasing in intensity to overcome skin resistance (Ohm's Law). It then rises to a peak in order to deliver the full power of the microcurrent energy deep into the muscle.
